

Are you a healthy older adult with no brain disease?

Help us understand how brain waves and movement change with aging

Investigators: David Vaillancourt, PhD and Shannon Chiu, MD

What is involved in this research study?

- One in-person study visit
- 2.5 hour session that will include brain wave and muscle activity recording during movement

You must be:

- 60-90 years-old
- Have no neurological conditions
- Fluent in English

Compensation

- Each participant will receive a \$25 gift card at the end of the study.
