

EEG in dementia with Lewy bodies (DLB)

Help us understand how brain waves and movement change in individuals with DLB

Investigators: David Vaillancourt, PhD and Shannon Chiu, MD

What is involved in this research study?

- One in-person study visit
- 2.5 hour session that will include brain wave and muscle activity recording during movement

If interested, please contact:

Marissa Schauder
schauderm16@ufl.edu
(352) 294-1771

You must be:

- A participant in the 1FL ADRC study
- 60-90 years-old
- A person with dementia with Lewy bodies
- Fluent in English

Compensation

- Each participant will receive a \$25 gift card at the end of the study
