

Alzheimer's Disease Research Center

Help Us Learn More About Memory Changes in Aging

1Florida ADRC Researchers throughout the state are working together to study the aging brain and learn more about how to detect and treat brain changes that affect memory during aging. Your participation can help create better tests and treatments.

STUDY FACTS

- Participation is free
- Compensation for time
- Annual Visits
- No Medication Involved
- Medical Referrals (if needed)

WHAT'S INVOLVED?

- 4-5 hour visit
- Memory Test
- Brain Imaging
- Blood Sample
- Medical History Review

WHO CAN JOIN?

- 45-90 years of age
- Must have study (relative, partner or friend)
- Fluent in English or Spanish
